# Photoshop Elements 5.0

AD-PS-ELM-AX Rev 07.09

## 1 day

### Description

In this course, students will learn about the components of Photoshop Elements 5.0, including the Organizer and the Editor. They will explore options for managing and viewing photos, and learn to apply tags and create collections. In addition, they will explore techniques for enhancing photos, such as removing red-eye and replacing color, cropping and straightening, applying filters, and adding text to photos. They will adjust photos both by using the Quick Fix feature and manual techniques, and learn how to process multiple files at once. Students will also learn how to resize and combine images, and how to create panoramas. Finally, they will learn various ways to work with finished photos, including printing, creating slide shows, and sharing photos via e-mail and the Web.

### Prerequisites

- *Windows XP: Basic or Windows Vista: Basic*
