SharePoint Designer 2007: Level 2

MS-50208 Rev 10.09

1 day

Description

This course is designed for information workers who wish to learn intermediate-level SharePoint Designer 2007 skills. Students will learn how to work with master pages and manage content placeholders and content regions. Students will also learn how to use Cascading Style Sheets and work with site templates. Finally students will work with contributor settings, learn how to manage sites, and understand accessibility standards.

Prerequisites

- *Basic knowledge of Windows and file management*
- *Basic knowledge of Microsoft Office 2007 products*
- *Experience using Internet Explorer*
- *SharePoint Designer 2007: Level 1*
